

# Criteria for ALS + BLS Direct to ED Triage

- Normal Mental Status (GCS 15)
- Stable Vital Signs
  - ✓ HR 60-100 bpm
  - ✓ RR 12-20
  - ✓ SBP 100/60 to 210/120
  - ✓ SPO2  $\geq$ 94% on Room Air
- Ambulatory without assistance (no fall risk)
- No SI/HI/Psychiatric hold (5150/5585)
- No high-risk presentations (e.g., focal neurological deficits, syncope, chest pain)

If your patient meets all the above criteria, ask the ED Charge RN if the patient is cleared to ED Triage!

Effective 2/5/2018, Revised 7/2024

Charge RN to Quick-Reg patient and use Prehospital template to enter:

- VS
- EMS unit
- Brief statement about patient stability and ambulatory to triage

\*MSE occurs in ED triage

If Charge RN unsure if clear for ED triage, call Purple Senior
