

HOT SHEET

ED Request for Specialty Appointment (Harbor Only)

SR 4446165860 CW 2001315
Effective July 25th, 2023

To improve the process of obtaining specialty follow-up appointments initiated by the Emergency Department, there is a new discharge order.

- Please ensure the ED to Specialty Clinical Referral Guidance document is followed.
 - If no approval is needed per the ED to Specialty Clinic Referral Guidance document, write the ED attending's name in the approving provider field.
 - When specialty approval is required per the document, place the approving specialty provider's name in the field.
 - After conversation with a consulting specialist, their specific recommendation supersedes any timeframe listed in the ED to Specialty Clinic Referral Guidance document.
- Once placed, these orders will route to the Patient Access Center (PAC) staff in the ED who will schedule an appointment. They will come to the bedside before the patient is discharged to ensure the appointment date and times are within the requested timeframe and acceptable to the patient.
