PHYSICAL EXAM

GEN: Well-appearing, No apparent distress

Resp: Normal work of breathing, speaking in complete sentences

Skin: No rashes on exposed areas

Neuro: A&Ox3, Gait: steady, narrow based

TREATMENT(S) PROVIDED, IF ANY:

CONSULTATION, IF ANY:

DIAGNOSTIC IMPRESSION:

Patient is ambulatory and non-toxic appearing. Afebrile and with unremarkable respiratory vital signs. Patient appeared well on exam, speaking in full sentences. Based on the limited examination there is a low suspicion for serious bacterial infection or systemic illness. Encouraged patient to continue with symptom alleviation. Encouraged to RTC if significant worsening of cough, and/or if patient develops fever that exceeds 100.4. Patient educated re: COVID-19 and staying in, social distancing, hand washing. Encouraged to take meds as Rx'ed.

PLAN:

COVID Person Under Investigation (PUI):

- Sent nasopharyngeal sample for COVID-19 testing
- Patient will f/u with EH for results, will isolate at home until cleared to work by EH*****

- No indication for hospitalization or additional imaging/labs
counseled to monitor symptoms, get rest and stay hydrated, wash hands often,
and other good hygiene precautions at home

- Homecare Instruction sheet provided
- Strict return precautions given
- Following medications dispensed:
